Maintaining Academic Integrity: How to Avoid Plagiarism

The word “plagiarism” means “kidnapper.” Plagiarism is taking someone else’s words and presenting them as your own. If you copy someone else’s work without citing the author, this is plagiarism. If you summarize an article and do not cite the author, this is plagiarism. If you paraphrase ideas from an article and do not mention the author, this is plagiarism.

When you quote a source:

1. quote it WORD FOR WORD,
2. use quotation marks,
3. and cite the source.

When you paraphrase or summarize a source:

1. use your own phrases and sentence structure,
2. and cite the source.

Is it better to quote or paraphrase?

It is better to use your own words to paraphrase the author’s intent. Quotations should be used sparingly. In academic papers, select only one or two quotations that are essential to the content.
